
1
Fading regime
κ, μ, m
14 regimes
2
FAS geometry
K = 100 ports
$W = 1$
3
Spatial correlation
$K \times K$ matrix
4
Channel realization
Scattered components
Shadowed dominant component
100 ports channel profile
Monte Carlo sampling
5
Channel dataset
$|h_k|^2,\ k = 1, \ldots, K$
1,000,000 realizations per regime
14,000,000 channel vectors
